

Haketilo - Feature #44

Load in default settings using the build system

07/02/2021 03:22 AM - jahoti

Status: Closed	Start date: 07/06/2021
Priority: Normal	Due date:
Assignee: jahoti	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version:	
Description Currently default settings are integrated into the source code, which makes it difficult to add or modify the built-in scripts. It would be significantly easier if the build process automatically integrated these from an exported file.	

History

#1 - 07/04/2021 04:47 AM - jahoti

- Status changed from New to In Progress

- Assignee set to jahoti

- % Done changed from 0 to 100

Patch pushed to git; awaiting acceptance/rejection from master branch.

#2 - 07/06/2021 12:06 PM - koszko

Perhaps we could load default_settings.json using XMLHttpRequest and this way reduce the complexity of build system and the amount of sed trickery?

Everything seems good, though. Accepting.

#3 - 07/06/2021 12:16 PM - jahoti

That would be a very, very good idea (albeit much less relevant if the build system is rewritten in JS).

#4 - 07/06/2021 01:48 PM - koszko

Btw, I am considering maintaining old build.sh alongside the new build.html. Plus, IMHO, changing to use XMLHttpRequest would be a good idea in case of the JS build system, too

#5 - 07/07/2021 12:05 AM - jahoti
