Target version:			

Description

This 400-line js file in koszko branch implements a declarative way of enforcing some format on JSON we parse. Unfortunately, I have not yet made any documentation for it. Please nag me if you need this. Otherwise, I shall instead move on to handling of repo-served JSON (that's what I wrote this JSON sanitizer for in the first place).

History

#1 - 12/22/2021 04:53 PM - koszko

- Status changed from New to Rejected

I concluded we should instead use the standard tools for the job: http://json-schema.org/
